Lemuel Koualao

Program Assistant

and Data Science Intern

Lemuel Koualao supports the CEIS team and mission as a program assistant and data science intern. His work involves helping businesses understand and deploy AI and data at scale and working in applied machine learning, quantitative analytics, and data engineering.

Koualao is pursuing a bachelor's degree in data science from the University of Rochester. In addition to his work with CEIS, Koualao also works in the office of the university's Goergen Institute for Data Science and Artificial Intelligence. He has worked as a data-analyst intern Analyst Intern at JPMorganChase and as an AI/ML research assistant and data-science intern with the University of Rochester Medical Center (URMC). At URMC he conducted applied research in National Language processing (NLP and machine learning to analyze large-scale social media data related to substance use and mental health.

His experience has enabled him to conduct financial data analysis across equity and fixed-income markets and design AI-driven scoring frameworks in Salesforce across 300+ organizations. As a student leader he has served as business manager of Resident Life D'Lion and vice president of the National Student Data Corps.
